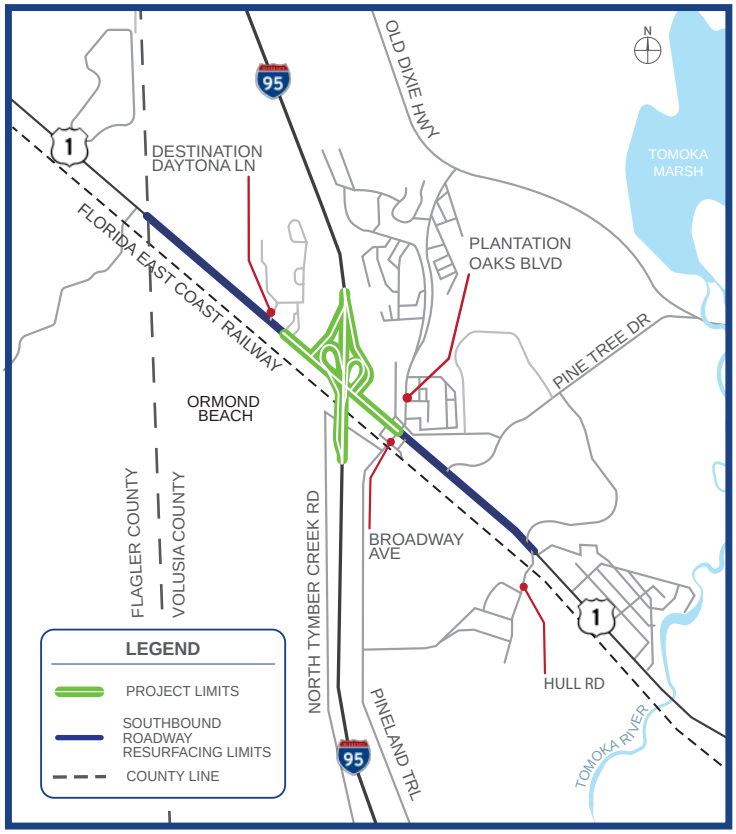
# Interstate 95 at U.S. 1 Interchange Improvements

Financial Project Identification (FPID) Number: 419772-3

## Modernizing the Gateway to Ormond Beach

The Florida Department of Transportation (FDOT) is rebuilding the I-95 at U.S. 1 interchange in Ormond Beach to improve safety and traffic flow. The improvements will make it easier for drivers to enter and exit I-95 and provide better connections for people walking and biking along U.S. 1. Construction is underway, with completion anticipated in summer 2029.

## Project Location



## Project Improvements

- Widens approximately one mile of U.S. 1 from four to six lanes from Destination Daytona Lane to Plantation Oaks Boulevard/Broadway Avenue.
- Resurfaces the southbound direction of U.S. 1 from the Volusia-Flagler County line to Hull Road.
- Constructs four new bridges and redesigns and widens the I-95 loop ramps to improve access to and from the interstate.
- Creates a more intuitive connection from southbound U.S. 1 to southbound I-95 with a right-side on-ramp, eliminating the need to turn left across traffic.
- Adds a shared-use path along U.S. 1 and protected, signalized crossings to improve pedestrian and bicyclist connectivity.
- Includes improvements at the I-95 and Old Dixie Highway interchange and Roscommon Drive to provide additional benefits to the community.
- Incorporates architectural elements that reflect the local community and establish the interchange as a gateway to Ormond Beach.

## Stay Informed

*Stay Connected Throughout Construction*

### Sign-Up for Project Updates

Email Zoe.Vogt@dot.state.fl.us to ask questions and sign up for construction updates, notices about planned lane closures, and project event announcements.

For media inquiries, please contact: FDOT-D5COMM@dot.state.fl.us

### Visit the Community Hub

Schedule an in-person visit to learn about the project and meet the team.

Book a visit by scanning the QR code or visiting:
