“On behalf of the River to Sea Transportation Planning Organization, I want to thank you for the work you do serving the State of Florida and as a representative of our planning area. As growth and development continues to increase throughout the state, we recognize the importance of an efficient and resilient transportation system that supports Florida’s economy and provides safe modes of travel for all residents and visitors alike. We look forward to working with you to tackle challenging transportation issues and to provide the support you may need during the 2023 Legislative Session.”

River to Sea TPO Chairperson, Barbara Girtman

2023 Legislative Positions

Adopted by River to Sea TPO Board 11-30-2022

- **Increase transportation investment through dedicated, flexible and sustainable funding**
- **Improve transportation safety by discouraging distracted driving, designing for appropriate speeds & improving pedestrian and bicycling safety**
- **Increase the efficiency and resiliency of transportation systems by maximizing the deployment of advanced transportation technologies**

Thank you for considering the legislative positions established by the River to Sea TPO. As these positions were developed, consideration was given to the positions established by organizations throughout the state of Florida including the Florida Association of Counties (FAC), the Florida League of Cities (FLC), Florida Public Transit Association (FPTA) and the Metropolitan Planning Organization Advisory Council (MPOAC). We value our relationship with these organizations and appreciate the support and leadership they provide.

River to Sea TPO Legislative Issues Subcommittee

Transportation Priority -- Funding

The River to Sea TPO supports legislation that increases transportation investment through dedicated, flexible and sustainable funding.

Background

Transportation revenue is collected to support the preservation and development of a safe, efficient and resilient transportation system that supports economic development, freight mobility, tourism, bicycle and pedestrian safety, accessibility and public transit among others. Actions supported by the River to Sea TPO to preserve these programs include:

- **Analyze Potential New Revenue Sources Needed to Preserve the Transportation System**

While we recognize the benefits of autonomous vehicles (AV) and alternative fuel vehicles (AFV) in improving transportation efficiency, safety, and air quality, we also understand the potential impacts on fuel sales throughout the state of Florida. The River to Sea TPO supports the analysis of additional revenue sources such as vehicle registration fees, electric charging station surcharges and mileage-based fees to determine whether implementation ensures equity among all road users contributing to the maintenance and preservation of the existing system.

- **Develop a resilient network of transportation infrastructure**

Resiliency reflects the ability to anticipate, prepare for, and respond to changing conditions, and recover rapidly after disruptive events such as flooding, hurricane damage, sea level rise, wildfire, or major traffic incidents. It is important for the transportation system to be resilient in the face of these disruptions to ensure reliable movement of people and goods. The River to Sea TPO continues to support funding to address the effects of climate change on transportation infrastructure and evacuation routes.

- **Establishing flexible and predictable funding for transit projects**

Current state law limits the amount of funding that can be made available from the State Transportation Trust Fund (STTF) for transit projects for both capital and operating expenses. These limitations, which are not in place for roadway funding, make transit funding from the STTF less predictable for the purposes of planning and project implementation and artificially limits the ability of TPOs to implement priority transit projects.

- **Stabilize Funding Levels for the Transportation Regional Incentive Program (TRIP)**

TRIP funding promotes regional transportation planning and project development and has been used to fund important infrastructure improvements. The River to Sea TPO supports stable and consistent funding through TRIP to promote regional planning and project development.

- **Allow Strategic Intermodal System (SIS) and State Transportation Trust Fund (STTF) Dollars to be Used on Local Road Improvements that are Needed to Support the SIS or State Facility**

State law limits the allocation of SIS funds and STTF funds to use on those systems. However, there are occasions where the most effective solution to managing congestion on an SIS or state facility is to improve local arterial, collector and distributor roads. The River to Sea TPO supports increasing flexibility of SIS and STTF funds to be used “off-system” when improvements on supporting roads enhance freight, safety, emergency management, travel time reliability and congestion on the SIS or state road system.

Benefit

Efficient and resilient transportation systems are necessary to support a strong economy. Inadequate funding to support capital projects as well as operations and maintenance will lead to increased congestion and degradation of vital infrastructure. Increased traffic congestion has negative economic and environmental impacts.

Transportation Priority -- Safety

The River to Sea TPO supports legislation that improves transportation safety.

Background

These items are intended to support Vision Zero safety initiatives in the State of Florida as well as the national emphasis on transportation safety improvements outlined in the Bipartisan Infrastructure Law (BIL)

- **Improve Pedestrian and Bicycle Safety**

Florida consistently ranks at or near the top of the nation in pedestrian and bicycle injuries and fatalities. Increasing safety and reducing these rates requires education, engineering and law enforcement efforts. The River to Sea TPO supports:

- enhanced funding for educational programs that show positive results;
- strengthening existing pedestrian and bicycle safety laws;
- increasing performance driven funding for projects that address unsafe conditions;
- the installation of pedestrian crossing traffic control devices (beacons) in areas with documented safety concerns;
- Engineering and redesign of roadways for appropriate speeds; and
- local participation in FDOT's High Enforcement Visibility Program

The 2022 Dangerous by Design report listed the Deltona-Daytona Beach-Ormond Beach Metropolitan Area, which encompasses both Volusia and Flagler County, as the most dangerous metropolitan area in the nation for pedestrians. Florida DOT is using the Alert Today, Alive Tomorrow program along with changes in design standards and their Vision Zero campaign to drive down pedestrian fatalities and injuries throughout the state.

The River to Sea TPO supports FDOT's Target Zero initiative to reduce the number of transportation related serious injuries and fatalities across Florida to ZERO, by focusing on influencing change in dangerous driver behaviors before serious and fatal crashes occur and aligning resources and establishing actions for all safety partners to take evolutionary steps to improve how Florida connects, interacts, plans, designs, operates, and maintains its transportation system.

- **Expand Regulations on Distracted Driving**

Recent crash analyses completed by the River to Sea TPO shows that crashes resulting from distracted driving occur at a higher rate than other crash types. The River to Sea TPO supports legislation that would continue to improve roadway safety by expanding regulation on distracted driving.

Benefit

Transportation safety is critical for residents and for the thousands of visitors who choose to vacation here. Changes in Florida law along with other crash reduction efforts improve quality of life and support economic development.

Transportation Priority -- Advancing Technology

The River to Sea TPO supports legislation that increases the efficiency and resiliency of transportation systems by maximizing the deployment of advanced transportation technologies.

Background

Transportation technologies are advancing in ways that will transform the industry and, potentially, how people and goods will move in and between our metropolitan areas. Transportation Network Companies (TNC's) such as Uber and Lyft, automated and connected vehicles, advanced transit systems, advanced traffic signals, and drone delivery as well as technologies not yet developed, provide tremendous opportunities to improve the efficiency and safety of travel.

The River to Sea TPO supports and encourages the Florida legislature to continue establishing state laws and funding mechanisms to support the development and implementation of these technological advances. Potential actions include:

- Increased infrastructure funding for projects that advance Automated, Connected, Electric and Shared (ACES) technologies.
- Increased funding and technical assistance to support the planning and implementation of Smart Cities, automated vehicle pilot projects and other technology innovations.
- Establishing laws that address the malicious and intentional interference of the proper functioning of transportation vehicles and systems.
- Continued promotion of interoperable and multi-modal smartcard technology that is compatible, universal and accessible for use by all other smartcard technology systems.
- Legislative support and funding for the regulation and infrastructure modifications needed to safely and effectively manage the expansion of micro-mobility devices.
- Requiring public Electric Vehicle Support Equipment (EVSE) to be open to all users regardless of membership to a specific charging network

Benefit

Advanced technologies in transportation will transform our communities and our economies. These technologies have the potential to dramatically improve safety and efficiency of our existing transportation infrastructure. They also offer improvements in air quality, mobility for transportation disadvantaged people, and quality of life advantages. Cities and states that are proactive in the deployment of transportation technology will be better positioned for success and economic stability in the future.

The River to Sea TPO also supports legislation that:

- Fully restores the budget authority for the Commission for the Transportation Disadvantaged (CTD).
- Protects the State Transportation Trust Fund (STTF) and the Transportation Disadvantaged Trust Fund from efforts to reduce or divert funds.
- Offers incentives for employers that reduce peak-hour demand by allowing off-peak commuting and telecommuting options to employees.
- Increases MPO/TPO involvement in growth management, mobility planning and visioning activities to promote a stronger linkage between land-use, transportation and economic development.
- Increases the percentage of the state transportation capacity program allocated to non-SIS highways and transit programs in order to improve mobility on regional and metropolitan area transportation facilities.
- Requires TPO concurrence for public-private partnership agreements related to the lease or sale of transportation facilities that are publicly owned and operated within metropolitan areas and any subsequent modifications to such agreements.
- Provides mandatory funding for driver education programs in high schools.
- Changes the Consultants' Competitive Negotiation Act (CCNA) to allow agencies to introduce a "best-value" option that considers cost as a factor when selecting a firm.
- Indexes local option fuel taxes to keep pace with inflation.

The River to Sea TPO will monitor legislation that:

- Authorizes counties to form a regional transportation finance authority for the purpose of financing, constructing, maintaining and operating transportation projects that are consistent with MPO plans.
- Proposes to establish Tax Increment Financing (TIF) districts associated with expressway or passenger rail corridors for the purposes of financing the debt issued to pay for the project.
- Promotes the continued development and expansion of bus and rail transit as well as efforts to accommodate the growing demand for alternative mobility vehicles (low-speed vehicles, electric vehicles and golf carts).
- Imposes restrictions on Metropolitan Planning Organization (MPO) governing board membership, voting, and/or terms of service.
