**Attend Either Date. Time: 1:30 pm – 4:00 pm**

**Register here: <https://www.surveymonkey.com/r/RRAPWorkshops>**

### RESILIENCY:

The capacity of individuals, communities, institutions, businesses, and systems within a region to plan, sustain, adapt, recover, improve and grow collaboratively—regardless what kind of chronic stresses and acute shocks they experience—through specific actions and implementation strategies geared to address specific vulnerabilities.

*(adapted from 100 Resilient Cities for the Regional Resiliency Action Plan)*

"Resiliency" has become the new norm for communities as they plan for and respond to increasing disasters, flooding, sea level rise, and other potential vulnerabilities. Understanding the challenges, opportunities and trends for private and public organizations in preparing and planning for resiliency can be overwhelming. With support from the Department of Environmental Protection, the East Central Florida Regional Planning Council is working with stakeholders to develop a Regional Resiliency Action Plan *to implement resiliency and climate adaptation strategies across disciplines.*

**Meet with representatives from private and public organizations to discuss economic and social resilience based on the following four parameters:**

- \* *Leadership and Strategy*
- \* *Health and Wellbeing*
- \* *Infrastructure and Environment*
- \* *Economy and Society*

### LISTENING SESSION GOALS

- Identify actionable items for businesses and economic stakeholders to better prepare, plan and implement resilience.
- Discuss barriers to implementation and identify solutions.
- Identify the role of local businesses and economic agencies for actionable items.
- Increase the community's ability to implement resiliency and climate adaptation strategies to enhance economic and social resilience.
