Votran TAM Targets and Inventory Summary

Appendix A	Asset Register
Appendix B1.1	Revenue Vehicle (Rolling Stock) Condition Data (BU)
Appendix B1.2	Revenue Vehicle (Rolling Stock) Condition Data (CU & MV-1)
Appendix B2	Equipment Assets
Appendix B3.1	Facilities Assets (950 Big Tree Road)
Appendix B3.2	Facilities Assets (1344 Tractor Way)
Appendix B3.3	Facilities Assets (207 Mary McLeod Bethune Blvd)
Appendix B3.4	Facilities Assets (701 Earl St)
Appendix B3.5	Facilities Assets (Passenger Facilities/Bus Shelters)
Appendix C	Proposed Invested Project List
Appendix D	Fleet Replacement Module Output

1.0 INTRODUCTION

Votran is the recipient of federal funds granted from the US Department of Transportation through the Federal Transit Administration (FTA). In receiving these funds, Votran is obligated to undertake various actions as directed by FTA.

Federal legislation enacted in 2012 included the program for funding transit systems and highways, termed Moving Ahead for Progress in the 21st Century (MAP-21). The provisions of MAP-21 include requirements for sound transit asset management, performance expectations and increased accountability. One such new requirement in process is the development and maintenance of a Transit Asset Management Plan (TAM). In anticipation of this requirement becoming mandatory, Votran prepared this TAM, in advance of the expected FTA directive. The first version of this document was finalized for Votran in March 2016.

In July 2016 the FTA published the final rule [49 CFR § 625.45 (b)(1)]. This document is being shared with the TPO in September 2018, thereby meeting the deadline of October 2, 2018. The plan must be uploaded in National Transit Database annual report cycle in January 2019.

Votran is a Tier II agency, operating less than 100 fixed route vehicles. The FTA template for supplying the required reporting data tables and forms are shown as appendix items. The data will be updated periodically to reflect changes in the asset status. Votran TAM targets are on the first page of the first appendix.

Through asset management, FTA stated, “transit agencies can more effectively use available funds to improve the physical condition and performance of their system. This, in turn, has the potential to increase ridership” (U.S. Department of Transportation, Federal Transit Administration, *Asset Management Guide: Focusing on the Management of Our Transit Investments*, October 2012, FTA Report No. 0027. In addition, FTA cited the following business benefits associated with improved asset management practices:

Table 1. Transit Asset Management Benefits

Business Benefits	Asset Management Approach
Customer service improvement	<ul style="list-style-type: none"> Improves on-time performance and service operations, vehicle and facility cleanliness; reduces missed trips, slow orders, and station shutdowns Focus investments around customer-centered goals and metrics
Increased productivity and reduction in costs	<ul style="list-style-type: none"> Maintain assets more effectively, using conditions-based approaches and using predictive and preventive maintenance strategies (when feasible) to reduce costs while improving service delivery
Optimized resource allocation	<ul style="list-style-type: none"> Better align spending with agency goals and objectives to obtain the greatest return from limited funds Incorporates lifecycle cost, risk and performance trade-offs into capital programming and O&M budgeting
Improved communications	<ul style="list-style-type: none"> Provide stakeholders with more accurate and timely customer-centered performance indicators Provide tools to communicate forecasted performance metrics (including level of service) based on different levels of funding

1.1 **OBJECTIVES**

To meet the criteria in the previous section, this TAM Plan:

- Establishes an inventory of current Votran assets;
- Documents the current condition of the assets;
- Lists procedures in place to maintain the assets in a State of Good Repair (SGR) as defined by FTA; and
- Presents best practices guidelines for continuing fleet operation while maintaining effective transit asset management.

Votran's assets include rolling stock and facilities' furniture, fixtures and equipment (FFE). In preparing the asset inventory, original asset construction cost or purchase price were at times estimated when an original purchase price was unavailable. Asset replacement costs were based on prevailing standard industry costs.

1.2 VOTRAN SYSTEM OVERVIEW

The Volusia County, Florida County Council created the County's public transportation system, Votran, in 1975, as a service of the County government. Votran currently provides transportation to urban and rural areas of the County using: a fixed route fleet of heavy duty vehicles with a life cycle of 12 years and 500,000 miles; and a paratransit fleet of cutaway type vehicles with a life cycle of 7 years or 200,000 miles.

Facilities include the following:

- Mobility Management Center (administration and primary operations and maintenance center) in South Daytona;
- Intermodal Transportation Facility in Daytona Beach;
- Transfer Plaza in Daytona Beach;
- Bus transfer and paratransit facility in New Smyrna Beach and
- Westside Operations and Maintenance Facility in Orange City.

Votran operates fixed-route bus service and demand-response complimentary ADA paratransit service seven days per week within the urban areas of Volusia County. Sunday service is limited to certain core area routes in the Daytona Beach area. Service hours are from approximately 6 AM to 7 PM. Night service is operated from approximately 7 PM until midnight Monday through Saturday, limited to the same routes as Sunday service. Votran has a peak-period operational level of 64 buses for fixed route service and approximately 62 paratransit buses.

Votran provides limited service on Memorial Day, Fourth of July and Labor Day, Thanksgiving Day, Christmas Day and New Year's Day.

The 2019 census estimates showed a total population of approximately 553,284. Of this, 17.5% of the population was under 18 years of age, and 24.8% of the population was over 65 years of age.

1.3 **ASSET MANAGEMENT PLAN REQUIREMENTS**

Per FTA, the Votran TAM Plan must:

- Using objective and consistent measurement standards, determine the condition of capital assets (facilities, rolling stock, FFE and infrastructure);
- Establish performance measures for (SGR), and set targets for achieving SGR for the transit system;

To that end, this document includes tabular data compilations of the following:

- Facilities and FFE inventory, and their replacement cost estimates
- Rolling stock inventory, and their replacement cost estimates using current fiscal year capital asset expenditure budgets
- 2021 eligible facility FFE and rolling stock inventory

Following the implementation of this TAM plan, Votran will annually review and update this document to address the following items:

- Current condition of the system assets (SGR)
- Changes in conditions in the period following issuance of the previous TAM;
- Evaluating targets set in the previous TAM Plan and Votran's performance in meeting the targets.

2.0 ASSET INVENTORY AND REPLACEMENT COST

2.1 ANALYSIS ASSUMPTIONS

Assumptions employed in compiling the inventory and calculating replacement costs for this TAM Plan included:

- Per FTA, assets are classified as individual items, or groups of items with the same function (example – furniture) with a total cost equal to or exceeding \$5,000.
- Building replacement costs were determined using an annual cost adjustment factor of 3%.
- Original construction costs for Votran’s facilities follow:
 - Mobility Management Center - \$13 million.
 - Transfer Plaza – \$3.0 million.
 - Intermodal Transit Facility – \$1.6 million.
- Equipment and machinery permanently attached to a structure were considered part of the structure. Examples’ include overhead rail-mounted lifts/hoists, HVAC systems, lighting, plumbing/mechanical/electrical building systems, and rest rooms/locker rooms.
- Furnishings, fixtures and equipment (FFE) replacement costs were determined using one of several cost references: 1) Votran costs for recently purchased similar items; 2) current manufacturer pricing; 3) Consumer Price Index Research Series data.
- Rolling stock replacement costs were based on Votran’s recent purchases of similar vehicles. A 5% vehicle cost increase was employed for fixed route vehicles.
- Useful life estimates were based on available resources, such as IRS depreciation schedules, FTA guidance, industry standards, or in-house experience.

2.2 ASSESSMENT AND MEASUREMENT ASSUMPTIONS

This section lists the qualitative evaluation criteria employed to determine condition of facilities, FFE and rolling stock.

2.2.1 FACILITIES AND FURNITURE, FIXTURES AND EQUIPMENT

Baseline assessment of the facilities, including furniture, fixtures and equipment (FFE), employed the following criteria:

Table 2. Facilities and FFE condition

Rating	Overall Condition
4 (Excellent)	No visible defects, new or near new condition, may still be under warranty if applicable
3 (Good)	Good condition, but no longer new, may be slightly defective or deteriorated, but is overall functional
2 (Marginal)	Defective or deteriorated in need of replacement; exceeded useful life
1 (Poor)	Damaged or in need of immediate repair; past useful life

2.2.2 ROLLING STOCK

In terms of its rolling stock, Votran's approach to managing its fleet assets is first established at vehicle purchase and is tracked through Votran's Maintenance Plan. Each purchased vehicle is assigned a service life in terms of both Life Years and Service Miles. The Maintenance Department maintains a comprehensive database of all revenue vehicles, organized into the following vehicle categories:

- Fixed route
- Paratransit

For each of the above vehicle categories, the database spreadsheets include a periodically updated vehicle replacement program by year with a long-term look-ahead projected replacement schedule, and in addition tracks the following vehicle criteria:

- Asset Category
- Asset Class
- Asset Name

- Make
- Model
- County
- ID/Serial No.
- Asset Owner
- Acquisition Year
- Vehicle Mileage
- Replacement Cost/Value

Concurrently, and as an integral part of the facility's preventive maintenance program, detailed spreadsheets are populated and tracked for each vehicle's engine and transmission. Spreadsheets are maintained on a monthly basis for engines and transmissions, and for specific vehicle classes. By providing the following entries, these spreadsheets serve Votran management in terms of both a proactive engine/transmission maintenance tracking and refurbishment schedule along with a five year look ahead cost forecasting model to help ensure funding is available to properly maintain the fleet:

- Vehicle number
- Engine (or transmission) number
- Install mileage
- Current mileage
- Mileage remaining
- Projected replacement and projected cost for the next five fiscal years

2.3 INVENTORY AND REPLACEMENT COSTS

Facility replacement costs were estimated using a 3% per year cost adjustment factor.

3.0 STATE OF GOOD REPAIR APPROACH

3.1 INTRODUCTION

As stated in Section 1.0, FTA’s development of formal TAM Plan requirements remains a work in progress. From an overall perspective, the Plan seeks to develop the recordkeeping and procedures to facilitate maintaining Votran’s assets in a state of good repair (SGR), a concept deemed increasingly important by FTA. Similar to the TAM Plan status, no single industry-accepted definition of SGR is in place as of this writing. That said, SGR is addressed in a number of recognized guidance documents, notably:

- American Public Transportation Association (APTA) – two documents were issued August 28, 2013 by the Transit Asset Management Working Group:
 - APTA SGR-TAM-RP-001-13, *Creating a Transit Asset Management Program*.
 - APTA SGR-TAM-RP-00-13, *Defining a Transit Asset Management Framework to Achieve A State of Good Repair*.
- FTA, *Asset Management Guide: Focusing on the Management of Our Transit Investments*, October 2012, FTA Report No. 0027.

The referenced FTA document, in introducing transit asset management, provided a definition of transit asset management, reproduced below and followed by its two core concepts, as follows:

“Transit asset management is a strategic and systemic process through which an organization procures, operates, maintains, rehabilitates and replaces transit assets to manage their performance, risks, and costs over their lifecycle to provide safe, cost-effective, and reliable services to current and future customers.”

“Concept 1, Customer Level of Service – Asset management can affect level of service by improving on-time performance and vehicle cleanliness, and by reducing missed trips, slow orders, and service and station shutdowns. It can also improve safety, security, and risk management. Asset Management provides accountability and communicates performance and asset condition to customers.”

“Concept 2, Lifecycle Management – The core of asset management is understanding and minimizing the total cost of ownership while still maximizing its performance. Transit asset management integrates activities across departments and offices in a

transit agency to optimize resource allocation by providing quality information and well-defined business objectives to support decision making within and between classes of assets.”

Proper asset management is fundamentally important to maintaining SGR. Section 2 of this document provided the baseline data for SGR management – the detailed assets inventory and replacement costs, necessary components for establishing lifecycle asset management protocols. Proper management of these assets (including maintenance, repair, rehabilitation and replacement when required) within budgetary constraints allows the mechanism with which Votran can provide the required level of service (LOS) to its customer base.

The remainder of this section documents Votran’s in-place data management and operational procedures that were initially developed to achieve the system’s SGR, and are currently employed to maintain its SGR.

3.2 SPECIFIC SGR OBJECTIVES AND METHODS

The concepts above can be in turn broken down to provide specific, measurable objectives necessary for maintaining SGR, such as:

- Developing and continually updating the asset inventory, keeping current with all procurements, implementation and disposals for facilities, FFE and rolling stock;
- Recording and updating asset condition, important for tracking the overall SGR, asset needs and determining replacement priorities;
- Developing a system of asset performance measures, necessary for evaluating the adequacy of the asset for its intended purpose;
- Tracking lifecycle costs, inclusive of the asset procurement, implementation, operation, maintenance and disposal costs. Compiling these data allows for informed decision making to determine strategies for asset renewal versus replacement;
- Financial planning allows for timely communication of anticipated asset funding that must be in place for the viability and sustainability of the system;
- Asset management and maintaining SGR require periodic program evaluations to allow for continuous improvement in managing the system assets. In other words, the TAM Plan is a document that will never be finalized, but continually updated in keeping with the goals described herein;

- Evaluating and managing risks associated with the individual assets, evaluating which assets are critical to system operations.

The SGR objectives tracked by Votran and the in-place methods to maintain the SGR status quo follow.

Votran monitors operations costs, maintenance expenses, rehabilitation and replacement needs against the funding limits of its budget. Funding ‘burn rates’ are evaluated in the context of the planned asset replacement schedule versus the overall budget limits on a continual basis throughout each fiscal year.

Management of Votran’s rolling stock ensures each vehicle remains in SGR until such time that the vehicle reaches the end of its useful life, using the cost monitoring and funding techniques described in the previous paragraph.

Votran has multiple equipment contracts and basic ordering agreements in place with multiple vendors, and also relies on the Volusia County competitive procurement system for major asset procurement, ensuring competitive pricing for asset purchases. Repairs, upgrades and related facility enhancements to maintain SGR are prioritized, scheduled and competitively bid.

Similar to facilities management, FFE needs are continually evaluated and spending is prioritized to maintain SGR while staying within budget limits.

All assets are tracked and managed (facilities, FFE and rolling stock) through Votran’s existing DPSI iMaint software and Volusia County’s AMS Program.

Performance measures include monthly reporting of on-time performance data, trip information, hours and mileage information, and related vehicle/driver information, and are discussed in more detail in Section 3.5.

Annual reviews of the TAM Plan will be conducted by September 30 of each year, coinciding with the end of the fiscal year. The updates will address the current condition of the system and its assets, and determining if the assets remain in SGR. In addition, the update will report on any change in asset condition(s), discuss performance measures and whether the targets were met, and include corrective

action(s) as needed. Also, the update will include a financial analysis, looking forward to the next year's budget relative to the financial performance for the year ending, and determine if any asset allocation strategy revisions are needed.

Another important task for the annual review will be to revise the list of assets that have exceeded their useful life during the current year ending. The baseline for this effort is the spreadsheet information included in Appendix B, and the spreadsheets highlight those assets (facilities, FFE and/or rolling stock) that are currently still in service, but have exceeded their projected useful life. As part of the annual review, each such asset will be evaluated to determine the appropriate course of action (replacement, retirement [if the asset is no longer needed for operational sustainability], or extension of service). Where applicable, the assets expected life can be revised and the asset returned to the working inventory.

3.3 **ASSET INVENTORY AND CONDITION DETERMINATION**

Votran's facilities are currently in a state of good repair. Votran sets aside approximately 2% of its budget annually for facilities maintenance and improvements. To illustrate, considerable improvements have been made in the past several years to the facilities using Federal funding:

- Mobility Management Center, Management Center (Administration, Operations and Maintenance facility) -- roof replacement was conducted in two buildings, the HVAC system was replaced with a chiller system, and submetering was installed, resulting in better energy monitoring and improved facility performance.
- Bus Transfer Plaza – roof repairs were completed, the HVAC system was replaced and high efficiency lighting was installed, improving performance and increasing safety.
- Intermodal Transportation Facility – the existing air conditioning system was replaced with a high efficiency mini-split system, resulting in improved performance.
- Westside Maintenance Facility – concrete paving of parking lot/service island

In 2014, Votran updated its facility and system operational efficiencies by establishing its Westside Maintenance facility in Orange City. Use of this facility has significantly reduced deadhead expenses and maintenance costs for the fixed route buses serving the western portion of the County. Also, this location helped facilitate initiation of connector service to the area's recently established commuter rail system. Votran staff performs maintenance and repairs of vehicles, except for warranty repairs and specialized repairs such as engine rebuilds, transmission rebuilds and starter motor rebuilds. Through Fiscal Year 2021, Votran personnel completed 99% of scheduled preventive maintenance on time for its fixed route and paratransit vehicles. On-time preventive maintenance coupled with timely and thorough repairs have helped keep Votran's fleet of revenue vehicle in a consistent state of good repair. Through timely preventive maintenance and repairs, Votran has been able to extend the useful life of these vehicles.

Fixed-Route Hybrid Facts

- Fuel savings – the hybrids average 6.06 miles per gallon (mpg) compared to 3.7 mpg for the conventional diesel buses
- Replacing aging conventional diesel buses with the hybrids has lowered maintenance costs per vehicle
- By investing in hybrid buses, operating expenses have been lowered
- Maintenance costs have been reduced owing to longer brake life in the hybrids
- Thus far, total cost savings (lifecycle) cannot be calculated for the hybrids, as the 19 vehicles currently remain in service
- Votran will continue to monitor vehicle performance throughout each vehicle's lifecycle and incorporate this data in its long-term fleet operational decision making.

In addition, Votran has incorporated alternative fuel vehicles to help modernize the fleet. Votran has purchased four paratransit vehicles that operate on propane fuel. Conversion to propane, as expected has substantially reduce vehicle emissions while concurrently lowering fuel costs. Votran will continue to monitor vehicle performance throughout each vehicle's lifecycle and incorporate this data in its long-term fleet operational decision making.

Bus shelters are typically constructed using Votran funds; on completion, ownership of the structures is conveyed to the municipality in which each structure is located.

By meeting its (Votran) existing monthly reporting requirements and conducting the work described in this section, Votran's asset inventory (facilities, FFE, and rolling stock included in Appendices A and B) is considered to be in a state of good repair.

3.4 **PERFORMANCE MEASURES**

Service performance measures provide the tools with which to evaluate the operational effectiveness of the system, its financial condition and sustainability, and most importantly, the level of service provided to its ridership. In general performance measures follow generally accepted industry standards and fall into two categories – efficiency/effectiveness and quality of service.

Efficiency/effectiveness is measured through various metrics, such as passengers per revenue mile, passengers per revenue hour, farebox recovery and cost per passenger trip. Quality of service includes reliability in terms of on-time performance, and passenger load factor. These performance measures are described in the published Transit Development Plan

<https://www.votran.org/core/fileparse.php/6120/urlt/Final-Votran-Transit-Development-Plan.pdf> on beginning on page 3-16.

In addition, a proactive community outreach program is conducted through numerous approaches to gauge the effectiveness of Votran's service as perceived by the local community, and especially its ridership. Votran has at times conducted stakeholder interviews, paratransit user interviews, public workshops at multiple locations throughout the county, discussion groups and on-board transit surveys. A comprehensive outreach was conducted in 2021 for the current Transit Development Plan on beginning on page 4-1 of the published document,

<https://www.votran.org/core/fileparse.php/6120/urlt/Final-Votran-Transit-Development-Plan.pdf> .

Votran also actively conducts ad campaigns and distributes brochures in hard copy and through its web site, community network email distribution lists, and committee structure of the Transportation Planning Organization. Votran's community outreach program includes many events throughout the County.

3.4.1 FUNDING SOURCES

Currently, funding is provided through the following sources:

- Directly generated revenue:
 - Fares collected
 - Advertising
 - ID cards
- External funding sources
 - State assistance (Block Grant, FTA 5310, FTA 5311 and Corridor funds)
 - Volusia County Property taxes/General Fund
 - Federal FTA 5339
 - Federal FTA 5307 (all types)
 - Federal FHWA transfer (TPO set aside)
 - Sale of scrap
 - Accident repair recovery
 - Miscellaneous
- Potential future funding sources
 - Increased state assistance
 - Increased federal funding
 - Contracts with local governments
 - Contracts with private businesses
 - Sales tax
 - Increased general fund contribution

3.4.2 INVESTMENT STRATEGIES AND FUNDS ALLOCATION

Investment strategies and fund allocation on a fiscal year basis are generally scheduled through the River to Sea Transportation Planning Organization (TPO). Requests for funding, enhancements and resource allocation are submitted through the TPO's Transportation Improvement Program (TIP), a priority list of federal and state-funded transportation projects. Administered through the TIP, the TPO provides for the coordinated process with state and local agencies for the development and integrated management of transportation systems and facilities throughout the state.

3.5 **ASSET MANAGEMENT PROCESS ENHANCEMENTS**

Candidate asset management process enhancements are submitted to the Votran General Manager for evaluation, weighing the long-term benefits versus the enhancement viability. If recommended, the action item is processed through channels and assessed for available funding criteria through the TIP or other feasible funding mechanisms.

If an enhancement is required immediately, the approval process is compressed to the extent practical to address the risk level to be remedied. Funding is completed timely to ensure the risk is satisfactorily addressed.

This document is completed with the following set of spreadsheet tables that will be maintained in compliance with the FTA TAM Rule [49 CFR § 625.45 (b)(1)].

APPENDICES

Investment Prioritization

The list of prioritized investment projects is provided in Appendix C.

Votran Transit Asset Management Plan

Kelvin Miller, General Manager

Introduction

The Volusia County, FL County Council created the County's public transportation system, Votran, in 1975, as a service of the County government. Votran currently provides transportation to urban and rural areas of the County using: a fixed route fleet of heavy duty vehicles with a life cycle of 12 years and 500,000 miles and; a paratransit fleet of cutaway type vehicles with a life cycle of 7 years and 200,000 miles.

Votran has incorporated alternative fuel vehicles to help modernize the fleet. Votran has purchased four paratransit vehicles that operate on propane fuel. Conversion to propane, as expected has substantially reduce vehicle emissions while concurrently lowering fuel costs. As with its hybrid buses, Votran will monitor vehicle performance throughout each vehicle's lifecycle and incorporate this data in its long-term fleet operational decision making.

Votran staff performs maintenance and repairs of vehicles, except for warranty repairs and specialized repairs such as engine rebuilds, transmission rebuilds and starter motor rebuilds. Through Fiscal Year 2021, Votran personnel completed 99% of scheduled preventive maintenance on time for its fixed route and paratransit vehicles. On-time preventive maintenance coupled with timely and thorough repairs have helped keep Votran's fleet of revenue vehicle in a consistent state of good repair.

Votran's facilities are currently in a state of good repair. Votran sets aside approximately 2% of its budget annually for facilities maintenance and improvements. Votran staff performs regular facilities/equipment inspections, and tracks facilities and equipment usage and age. This information is used to place repairs and replacements in the Capital Improvement Program for funding and identification.

Performance Targets & Measures

Revenue Vehicles

Asset Category – Performance Measure	Asset Class	2022 Target	2023 Target	2024 Target	2025 Target	2026 Target
Age - % of revenue vehicles within a particular asset class that have met or exceeded their Useful Life Benchmark (ULB)	AB - Articulated Bus	N/A	N/A	N/A	N/A	N/A
	AO - Automobile	N/A	N/A	N/A	N/A	N/A

Decision Support

Investment Prioritization

Votran's facilities are currently in a state of good repair. Votran sets aside approximately 2% of its budget annually for facilities maintenance and improvements. Votran staff performs regular facilities / equipment inspections, and tracks facilities and equipment by usage and age. This information is used to place repairs and replacements in the Capital Improvement Program for funding identification. Votran staff performs maintenance and repairs of vehicles, except for warranty repairs and specialized repairs such as engine rebuilds, transmission rebuilds and starter motor rebuilds. Votran personnel completed 98% of scheduled preventive maintenance on time for its fixed route and paratransit vehicles. On-time preventive maintenance coupled with timely and thorough repairs have helped keep Votran's fleet of revenue vehicle in a consistent state of good repair. Through timely preventive maintenance and repairs, Votran has been able to extend the useful life of these vehicles. By meeting its existing monthly reporting requirements including the Votran's asset inventory (facilities, FFE and rolling stock, Votran is considered to be in a state of good repair.

Decision Support Tools

The following tools are used in making investment decisions:

Process/Tool	Brief Description
Useful Life in accordance with FTA/GAAP	Vehicles will be replaced according to their useful life and mileage and the cost vs savings from rebuilding/replacing parts as needed.
Useful Life in accordance with FTA/GAAP	Updated as needed and according to useful life (carpets, exterior painting)
Useful Life in accordance with FTA/GAAP	Updated as needed and according to useful life where appropriate and cost savings of rebuilding/parts replacing as necessary.

Appendix A: Asset Register

Asset Category	Asset Class	Asset Name	Make	Model	Count	ID/Serial No.	Asset Owner	Acquisition Year	Vehicle Mileage	Replacement Cost/Value

Appendix B: Asset Condition Data

B3.1: Facilities Assets (950 Big Tree Road)

Asset Category	Asset Class	Asset Name	Count	ID/Serial No.	Age (Yrs)	TERM Scale Condition	Replacement Cost/Value
Facilities	Administration/Maintenance	Volusia County Mobility Management Center (Building)	1	30055825	23	4	\$6,398,540.00
Facilities	Administration/Maintenance	CONCRETE SOUND WALL ON PROPERTY	1	30055881	9	4	\$93,624.00
Facilities	Administration/Maintenance	THRU WALL UNIT (Money room equipment)	1	141076	31	2	\$69,336.00
Facilities	Administration/Maintenance	VOTRAN Garage / Offices – Original office/maintenance facility. Rehab in 1998	1	30036201	40	3	\$1,015,408.00
Facilities	Administration/Maintenance	VOTRAN Garage / Offices Additions - Original office/maintenance facility. Rehab in 1998	1	30036201-01	30	3	\$46,272.00
Facilities	Administration	A/C RECYCLER	1	192266	7	4	\$7,150.00
Facilities	Maintenance	A/C RECYCLER	1	192267	8	3	\$7,150.00
Facilities	Maintenance	COMPRESSOR	1	192278	7	4	\$19,877.00
Facilities	Maintenance	Fuel Island (Original fuel island)	1	30055901	30	2	\$375,000.00
Facilities	Maintenance	Fuel Tanks (Original fuel tanks)	1	30055901	31	1	\$265,284.00
Facilities	Maintenance	Gasboy 50gpm Fuel Dispenser	1	176818	10		\$9,111.00
Facilities	Maintenance	Gasboy 50gpm Fuel Dispenser	1	176817	10		\$9,111.00
Facilities	Maintenance	Mobile Lifting Station	1	162659	17		\$28,672.00
Facilities	Maintenance	Test Simulator Odyssey	1	191537	8		\$15,628.00
Facilities	Parking Structures	Parking Lot and fence (Concrete rehab)	1	30055905	11	4	\$945,477.80
Facilities	Storage	Paint and Storage Building (Paint & Body building)	1	30036202	38	4	\$50,000.00
Facilities	Storage	Vehicle Storage Building (Rehab in 2008, now Regional Training Center)	1	30051701	35	4	\$51,450.00

B3.2: Facilities Assets (1344 Tractor Way)

Asset Category	Asset Class	Asset Name	Count	ID/Serial No.	Age (Yrs)	TERM Scale Condition	Replacement Cost/Value
Facilities	Maintenance	Westside Maintenance Facility	1		7	4	\$3,800,000.00
Facilities	Maintenance	Fuel Island	1		7	4	\$233,725.00?
Facilities	Maintenance	Bus Wash	1		7	4	\$144,212.00
Facilities	Parking Structure	Bus parking lot	1		7	4	\$900,000.00
Facilities	Maintenance	Air Compressor & Dryer	1		7	4	\$17,397.00
Facilities	Maintenance	Emergency Generator	1		7	4	\$50,279.00
Facilities	Maintenance	Portable Koni Lifts	1		7	4	\$49,750.00

Cost of other assets associated with the Westside Maintenance Facility are included in the original cost of the facility (\$3.8M).

B3.3: Facilities Assets (207 Mary McLeod Bethune Blvd)

Asset Category	Asset Class	Asset Name	Count	ID/Serial No.	Age (Yrs)	TERM Scale Condition	Replacement Cost/Value
Facilities	Passenger Facilities	Transfer Plaza	1	30055805	27	4	\$1,311,128.00

B3.4: Facilities Assets (701 Earl St)

Asset Category	Asset Class	Asset Name	Count	ID/Serial No.	Age (Yrs)	TERM Scale Condition	Replacement Cost/Value
Facilities	Passenger Facilities	ITF/Pedestrian Crosswalk	1	30065825	20	3	\$10,645,709.00
Facilities	Maintenance	Tennant Power Sweeper	1	162668	17		\$28,672.00

B3.5: Facilities Assets (Passenger Facilities/Bus Shelters)

Asset Category	Asset Class	Asset Name	Count	ID/Serial No.	Age (Yrs)	TERM Scale Condition	Replacement Cost/Value
Facilities	Passenger Facilities	4-2-M BUS SHELTERS	14		11	3	\$4,034.17
Facilities	Passenger Facilities	4-2-M BUS SHELTERS	10		10	3	\$3,815.67
Facilities	Passenger Facilities	4-2-M BUS SHELTERS	2		8	3	\$3,848.00
Facilities	Passenger Facilities	SL-05100FDO-BZ BUS SHELTERS	10		6	3	\$3,975.00
Facilities	Passenger Facilities	SLIMLINE SERIES BUS SHELTERS	10		5	3	\$3,975.00
Facilities	Passenger Facilities	SLIMLINE SERIES BUS SHELTERS	5		3	3	\$3,975.00

Bus shelters are either installed or in stock.

Appendix C: Proposed Investment Project List

Project Year	Project Name	Asset/Asset Class	Cost	Priority
2021	Westside Maintenance Facility Upgrades	Facilities	\$280,000	High
2021	Renovate ITF (701 Earl St)	Facilities	\$98,000.00	Medium
2021	Renovate Transfer Plaza (207 Mary McLeod Bethune Blvd)	Facilities	\$248,000	High
2021	Eastside Maintenance Shop	Facilities	\$538,000	High
2021	Diesel Bus Acquisition	RevenueVehicles	\$2,482,160.00	High
2021	Information Technology Upgrades	Equipment	\$640,000	High
2021	Eastside Parking Lot Expansion	Facilities	\$75,000	High
2021	Admin Building Renovation	Facilities	\$273,000	Medium
2021	Solar Lighting – Swallowtail Superstop	Facilities	\$28,000	Medium
2021	Fixed Route Engine Replacement	RevenueVehicles	\$783,000	High
2021	Fixed Route Hybrid Battery Replacement	RevenueVehicles	\$748,000	Medium
2021	Fixed Route Transmission Replacement	RevenueVehicles	\$42,000	Medium
2022	Propane Bus Acquisition	RevenueVehicles	\$718,508.00	Medium
2022	Gas Bus Acquisition	RevenueVehicles	\$998,487.00	Medium
2022	Diesel Bus Acquisition	RevenueVehicles	\$2,363,960.00	Medium
2023	Propane Bus Acquisition	RevenueVehicles	\$728,500.00	Medium
2023	Gas Bus Acquisition	RevenueVehicles	\$660,500.00	Medium
2023	Diesel Bus Acquisition	RevenueVehicles	\$2,620,584.00	Medium
